# PIVOTAL GROWTH

DRIVING RESULTS THROUGH PEOPLE PERFORMANCE

Pivotal Growth combines the power of its diagnostics, consulting and implementation services to help growth-driven companies understand and strengthen their performance capabilities. Our technology enabled proprietary diagnostic collects critical leadership insights and actions that take the guesswork out of understanding the capacity of leaders and teams. Our diagnostics examines four leadership drivers and 20+ performance dimensions. With our technology-based approach, companies can strengthen their performance, make the best people-focused investments and drive results.

OUR SERVICE MAP

DIAGNOSTICS

Leveraging technology and data analytics, our proprietary, technology based diagnostic tool provides an in-depth view of leaders and team capacity to lead and drive performance. Watch overview: Leadership Diagnostic Outcomes

CONSULTING

Our consulting services' unique methodology, technology and expertise provides critical data and action plans that support leadership development and program development.

IMPLEMENTATION

Using diagnostic data, we develop an action plan to achieve results. We specialize in cohort programs with program management, training, coaching and coach matching to 20+ certified coaches.

INDUSTRIES & CLIENTS

We work with varied sizes of corporations across a variety of industries, including Financial Services, Professional Services and IT. Some of our clients include RBC, Manulife, Bennett Jones, Atlantic Lottery, Nova Scotia Power, Symplicity Designs, and Volta. Common to them all is a high motivation to drive results.

LEADERSHIP

Lisa W. Haydon, is the founder of Pivotal Growth Inc. Lisa is an experienced corporate leader and leadership performance consultant known for her abilities to sort through business complexities, understand distinctive leader personalities and realize results.

Pivotal Growth is a professional services firm committed to providing growth-oriented companies with critical leadership data and action plans. Using technology-based methodology, we take the guesswork out of understanding the performance capacity of leaders and teams.
